

# SUPPORT EARLY CROP GROWTH WITH A SUPERIOR FOLIAR PHOSPHATE

Support strong, healthy crop growth early in the season by supplementing your fertility program with a superior foliar phosphate. **Ele-Max® Hi-Phos LC 8-30-2** provides high-analysis phosphate and key micronutrients to correct nutrient deficiencies and improve crop health.

Ele-Max Hi-Phos LC 8-30-2 is formulated with a 100% ortho-phosphate base. Ortho-phosphate is the most readily available form of phosphorus, which provides immediate uptake of nutrition into the plant.

In addition, Ele-Max Hi-Phos LC 8-30-2 is enriched with EDTA-chelated micronutrients, including copper, iron, manganese and zinc. Together, these components boost root growth in young plants and nourish crops during critical growth stages.

To support strong, healthy crop growth, contact your Helena representative or authorized dealer for more information on Ele-Max Hi-Phos LC 8-30-2.

## Hi-Phos LC 8-30-2

### PRODUCT HIGHLIGHTS

- High-analysis, 100% ortho-phosphate blend
- Contains a precision blend of EDTA-chelated micronutrients for early growth
- Improves root development
- Maximizes nutrient uptake & utilization
- Improves overall plant health
- Contains the building block technology of ENC (Ele-Max Nutrient Concentrate)
- Excellent tank mix compatibility
- Features a neutral pH & low use rates

#### FORMULATION:

Nitrogen 8% | Copper EDTA .05%  
Phosphorus 30% | Iron EDTA .10%  
Potassium 2% | Manganese EDTA .05%  
Boron .02% | Zinc EDTA .05%
